

Car Park Decking – Meadowlane Shopping

Centre

With the expansion of the Meadowlane Shopping centre, the developer wanted to create a stylish and up market shopping experience. In order to aid delivery of this experience for customers, a pleasant bright and safe multi-storey car park was added which incorporates approximately 500 covered car park spaces.

Larsen Contracts proposed the Sika Car Park decking system for the top decks and a clear sealer with coloured walkways and markings for the intermediate parking decks.

Project Details:

Client: Meadowlane Shopping Centre

Main Contractor: Mc Aleer & Rushe

Specialist Contractor: Larsen Contracts

Application:

Sika 350 Top Deck system, Larsen WBA Deck Sealer

Market:

Shopping Centre, Car Park Decking & Markings

The roof decks were protected using an Elastomeric waterproof crack bridging system (Sika 350) which is a decorative anti-slip protective system designed for Car Parking. The intermediate decks were sealed using Larsen's WBA environmentally-friendly, water-based acrylic sealer which is designed to provide protection against dusting and the ingress of oils and de-icing salts.

The coloured walkways and markings were designed to provide the shopper with a safe and pleasant parking facility as part of their experience at the Meadowlane Shopping Centre.
